

Book

It is sometime easier to read this kind of content as a continuous

$$S(f)(t) = a_0 + \sum_{n=1}^{+\infty} a_n \cos(n \omega t) + b_n \sin(n \omega t)$$

mid diamond — $|0\rangle$

$$\mathbf{R} \leftarrow \frac{\partial f}{\partial x} \rightarrow -x_0 \text{ verbar verbar pipe}$$

$|0\rangle$
