Who am I?

XXX Photo ? XXX

My name is Emmanuel PILLANT and I am 38. I'm living in south of France with my family.
Computer science has always been my favorite hobby. Since I'm 10 I spend a lot of time learning and understanding how computer works. At 16 I learned coding (in Turbo Pascal!) and spent a lot of time doing it.
At 25 I get a engineering certificate with computer science specialization. During 12 years I've been developer for industrial applications (embedded software, tactical data link, simulation, …), with multiple languages (mainly C/C++ but also java, python, Ada, …).
Right now and since 2 years I've left the world of development since I'm leading a team in charge of maintaining avionic rigs in operational conditions. This job is more related to metrology, which is very interesting domain too! Trying to expand my knowledge XXX lecture, musique, nature, physique (astronomie et sciences en général), j'aime transmettre (d'où ce site) XXX
